

# Meeting Minutes with G1

Location: J/P/002  
Date: 15/11/22  
Time: 12h00 - 12h45  
Attendees: Ana, Connal, Giuseppe

## Key items discussed

1. Presented the XML standards file to group 1
2. Discussed the following key parameters:
  - a. Concerns about shadows being available at desktop version
  - b. X and y coordinates is done by mapping the width and height and then specifying the coordinates based on that
  - c. A skimmer is available to check the XML documents (checks whether they are valid)
  - d. Instead of passing the URL of fonts, simply will pass the name of the font and if it's not available there will be a default behaviour
  - e. Their application (social media app) will need a slides feature
  - f. Looping cycles for music and videos
  - g. The rotation of images and videos is a must
  - h. Shapes are defined as their own elements
  - i. The font size will be defined in pts although they don't change with the screen size, the only thing the application needs to do is to open the file not display it in an appealing way
  - j. Colours will be defined in RGBA
  - k. We decided to remove start/stop time feature
  - l. There is no triangle native shape
3. Both teams agreed to the standards
