Meeting 1

Location: RKC
Date: 9/11/22
Time: 12h00 - 12h50
Attendees: Connall, Ophelia, Tom, Dawid, Oscar

Key items discussed

1. Discussed tweaks to be made on design:

   - Need more graphics in

   - Need more different types of media so that it's a multimedia platform

     - Might want to have an icon for the bird on the main page and have a real image on the duck/bird page

   - Sound icon: have it as a bird that makes a sound so that user understands that it's going to play the sound of the bird

   - Remove the camera icon for now, don't know if we'll be able to implement it

2. Discussed accessibility:
   - Colour blindness → Dawid already made it so that it was
   - Should we add a button that reads out the text?
3. Discussed media content to be created:
   - Text: create a doc and start gathering info on birds (maybe start with 3 or 4 of them) → goal is to have as many as we can
   - Icons: such as app icon
   - Images of birds: could also have photos of where the birds can be found on campus / an image of campus map with a dot to show where they are
   - Audio of birds: copyright free → do some research
   - Videos: could be used to present the fun facts of birds
   - Think about the about us page

Action items	Owner(s)	Deadline	Status
Start to obtain media	Media	Week	
Update design of app with tweaks mentioned above	Dawid	End week 7	Completed
